We've successfully combined new age materials with old world artisan craftsmanship to create a line of recovery bags and innovative storage rolls. Each item has clean, crisp, simple lines for a rugged contemporary look while boasting top of the line materials and handmade construction for extreme durability.

Hand crafted double wall construction using, a custom dyed black 12oz. water-resistant waxed canvas, combines with an upgraded poly liner on all exterior surfaces for extreme durability and protection. Popular throughout the ages, waxed Canvas is a tried and tested material, that is easy to clean, and ages with a unique patina. It's also easy to carry thanks to its lightweight properties, so it won't over encumber you if you take your tools to go.

Interiors are constructed with Go Rhino red 1000 denier Cordura® nylon for durability and protection as well as high visibility. To enhance visibility, some cases have a heavy-duty clear poly material reinforced with integrated nylon webbing for pockets to help you quickly locate the items you're looking for. We've reinforced the base of the bags with 2000 denier black Cordura® nylon while industrial strength 1-1/2" wide webbing completely wraps around the bottom of the bag further enhancing strength and durability. All items have YKK heavy duty zippers with paracord pulls for easy accessibility.
