GO RHINO®

E1
ELECTRIC RUNNING BOARDS

FOR POPULAR TRUCKS, BRONCOS, JEEPS & SUVS

Step in and out of your truck, Bronco, Jeep or SUV with ease.

Choice of finish:
Textured Black Powder Coat
(# PC)

Bedliner Coating
(# T)

Automatically retracts when door is closed
- Optimal ground clearance
- Protects rocker panel
- Automatic 'SAFE-STOP'

Immediately deploys when door is opened
- Dual motor technology
- Anti-slip, secure stepping area
- Integrated LED lights for safety

Open your door and the E1 Electric Running Board automatically deploys, providing a secure 6" wide durable aluminum running board with an anti-slip surface. For additional safety and security, the integrated LED lights turn on automatically when the board deploys. Close your door and E1 automatically retracts, providing your vehicle with optimal ground clearance and protection for its rocker panel while preserving the look of your vehicle.

With dual motors on each board, Go Rhino's E1 Electric Running Boards are reliable even in extreme climates. The easy-to-install, magnetically-activated door switches leave your OBD port free for other accessories. Automatic safety stop and manual override capabilities are included.

Most applications do not require drilling for installation.
