

## SRM500 ROOF RACK RAIL KITS

Go Rhino is introducing our full range of Rail Accessory Kits for SRM500 Roof Racks.

These accessory kits are available in Dual-Rail, Tri-Rail, and Quad-Rail configurations (55", 65", 75" lengths) to upgrade an existing SRM500 roof rack, or are preconfigured with side rails as complete ready-to-go combo kits.

### Features & Benefits

- Designed to work with the SRM500 line of roof racks
- Rails allow for safe and secure transport of gear
- Constructed entirely out of aircraft grade aluminum for light weight and durability
- Easily bolts on to SRM500 using existing nutserts
- Multi-stage black textured powder coat for good looks and protection from the elements
- Black GEOMET coated steel hardware
- Limited Lifetime Warranty on all workmanship and materials
- 5-Year Limited Warranty on all finishes

### Dual-Rail Kit

Dual rails keep your items from sliding off the sides of the rack. Perfect for securing long items such as surfboards, kayaks, fishing poles, and more!

### Tri-Rail Kit

Tri-Rail kits contain your gear on both the sides and the rear of the rack for a step up in security over a dual rail kit. The rear rail also serves as a perfect location to mount scene/camp lighting.

### Quad-Rail Kit

The Quad-Rail kits offer the most containment of all the other rail options. Easily mount lights and other accessories to any side of the rack.
