

ROCKLINE BUMPERS FORD BRONCO 2021-UP

Go Rhino's Rockline® Bumpers are designed to increase tire clearance for greater articulation, provide higher approach and departure angles, and protect your Bronco from trail damage. Each Rockline Bumper is constructed using a high-strength 3/16" steel center section with hand finished seams and powder coated in a textured black finish for unmatched durability and good looks.

FEATURES:

- CNC laser cut 3/16" steel center section
- Fully welded and hand finished seams
- Industry standard mounting slots hold up to a 12,000 lb winch (front bumper)
- Integrated non-slip center drop step
- Patented Rhino Hook shackle mounts can accommodate up to 7/8" D-rings
- Provisions for a wide variety of LED off-road lights, including XPLOR Lighting
- Increased approach and departure angles over stock
- Easy installation with no drilling or cutting
- 5 year warranty on the Textured Black Finish
- Limited Lifetime warranty on materials and construction
